Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the credit card approval process. This helps the team develop a customer-centric solution that provides fast, accurate, and transparent credit card eligibility predictions while improving the overall application experience.

SAYS • “I want to know if my credit card application will be approved quickly.” • “The application process is taking too long and is confusing.” • “I need clear reasons for why my application was approved or denied.”	THINKS • “I hope I meet the eligibility criteria for credit card approval.” • “I wonder if my income and credit history are good enough.” • “I need a reliable and transparent system to trust the decision.”
PERSONA NAME Credit Card Applicant <i>(Customer / End User)</i>	
DOES • Fills out the online application form with personal and financial details. • Submits the application and waits for the approval decision. • Checks the approval status and reviews the reasons provided for the decision.	FEELS • Anxious while waiting for the approval decision. • Frustrated by delays or unclear communication. • Relieved and satisfied when the process is quick, transparent, and easy to understand.
